**PRO-SPREADER/ACTIVATOR** is used to give optimum wetting and spreading of agricultural insecticides, miticides, fungicides, herbicides, and growth regulating hormones. **PRO-SPREADER/ACTIVATOR** is formulated from materials which do not tend to burn foliage or leave harmful residues. There will be no excessive foaming when high pressures are used. Use of correct quantity for smooth wetting reduces the possibility of spot injury from large pesticide droplets.

## **SUGGESTED APPLICATIONS**

Quantity to use will vary with the type of equipment, water volume per acre, temperature, type of foliage to be wet, and the pesticide formulation. **Also, higher rates than those below may be used if recommended by pesticide labeling. Follow pesticide label directions. However, do not add this product at a rate which exceeds 5% of the finished spray volume.**

- A. Ground Spraying:** Use 2 to 8 oz. per 100 gallons of water.
- B. Concentrate Air Blower Sprayers or Aircraft:** Use 6 to 12 oz. per 100 gallons of water, except where drift hazard is critical. Consult local agricultural authorities for any restrictions on use with hazardous materials.

**For use with Rodeo® Herbicide:** Use 1-2 quarts per 100 gallons of finished spray solution. Consult the Rodeo® label for proper rates and volume.
